Standard and Bullnose CornerBead Clinching Tool

Clinch-On Products Cornerbead Tool, the industry standard, has been providing the fastest and easiest cornerbead installation for over forty years.

The Clinch-On tool is best suited for use with Clinch-On Products cornerbead, but the tool will work with most brands and is so easy to use. Here's how:

1. Cut cornerbead to proper length.
2. Cornerbead flanges should be flush against wallboard panels before clinching.
3. Clinch cornerbead beginning at the midpoint of length by striking the tool's plunger head once with rubber mallet. Repeat the procedure every six inches working first toward the top and then the bottom of the cornerbead.
4. Reinforce cornerbead at doorways and windows with additional fasteners.

PRICING

Standard tool	Price Each
1-6	\$26.00
7-23	\$24.00
24+	\$21.00
Bullnose Tool	\$40.00
Mallet	\$5.00
